

Life Sciences Workers' Compensation

Occupational Disease Questionnaire

Do you work with any of the following?

EXPOSURE AREA	NO	YES
1. Hazardous compounds <i>a. Compounds known to be teratogens, mutagens, or carcinogens?</i> <i>b. Materials that produce dust, including silica?</i>	NO	YES
2. Blood, body fluids, or tissue samples that are <u>known to contain</u> human pathogens, or animal pathogens known to infect humans?		YES
3. Materials or equipment emitting ionizing radiation?	NO	
4. Nano-materials such as carbon nanotubes, fullerenes, buckyballs, nano-scale gold, nano-silver, nano-scale oxides, liposomes or drug delivery systems?		YES
5. Scientific animals in a vivarium setting?	NO	

If you answered "Yes" to #1a or #1b (hazardous compounds):

	No	Yes	Comments
In the Comments describe the amount and type of compounds with which you are working:			See attached list
Have you had an internal safety (OSH/EHS) professional or third party safety specialist (i.e. CIH) assess, evaluate, and validate your potent compound and/or chemical hygiene program? (If "no", please provide details on your specific materials, their use, and any employee safety/protection measures in this box.)		YES	All materials are used within best Safety practices to eliminate potential exposures. Chemicals are designated to be used within fume hoods.

If you answered "Yes" to #2 (blood borne pathogens):

	No	Yes	Comments
In the Comments describe the amount and type of materials with which you are working:			Whole blood samples up to pint quantities. Some samples are spiked with Candida strains
What is the Biohazard Level of the pathogens with which you are working?			BSL 1 ___ BSL 2 <u>X</u> ___ BSL 3 ___ BSL 4 ___
Do you have a formal risk assessment procedure (including blood borne pathogen program where applicable)?		YES	

Is access to lab/storage areas limited to authorized personnel trained to work in BSL labs or with blood products?	Yes		
--	-----	--	--

If you answered "Yes" to #3 (radiation):

	No	Yes	Comments
In the Comments describe the amount and type of materials with which you are working:			
Do you have a radiation safety program per the Nuclear Regulatory Commission (NRC)?			
Are employees monitored for radiation exposure?			
Do you have a radiation safety officer (RSO)? (If "yes", please provide name)			

If you answered "Yes" to #4 (nano-materials):

	No	Yes	Comments
In the Comments describe the amount and type of materials with which you are working:			See attached
Have you conducted a worker safety risk assessment to identify safety controls needed for nano-material activities?		YES	All materials are used within best Safety practices to eliminate potential exposures.
Have you provided training to workers on the potential hazards and safety controls for the nano-materials in use?		YES	All materials are used within best Safety practices to eliminate potential exposures.

If you answered "Yes" to #5 (vivarium):

	No	Yes	Comments
In the Comments describe the amount and type of animals with which you are working:			
Does your vivarium risk management program formally include prevention of zoonotic diseases?			

The statements, information or answers given above are true, accurate and complete. I have not willfully concealed or misrepresented any material fact or circumstance concerning this questionnaire. I understand and agree that Chubb is relying on such statements in determining whether or not to issue insurance.

Name:	Marc Jones
Title:	CFO
Date:	May 7, 2014

Signature: _____

01

compound	hazard	amount
Acetic Acid	Teratogen	3L
Acetonitrile	Mutagen	4L
Acetylsalicylic Acid	Mutagen	100g
Adenosine triphosphate	Mutagen	
Ampicillin	Teratogen	50g
Butanol	Teratogen	500mL
Chloroform	Carcinogen	500mL
Clindamycin	Teratogen	30g
Dextran	Teratogen	50g
Dimethylaminopropyl Ethylcarbodiimide Hydrochloride	Teratogen	10g
Ethanol	Mutagen	3L
Gentamycin	Teratogen	500mg
Hydrochloric Acid	Teratogen	1L
Imidazole	Mutagen	100g
Isopropanol	Teratogen	5L
Manganese Sulfate	Mutagen	500g
Methanol	Mutagen	500mL
Mineral Oil	Teratogen	3.5L
Phenol	Teratogen	25g
Potassium thiocyanate	Teratogen	250g
Silver Nitrate	Mutagen	5g
Sodium Azide	Mutagen	25g
Sodium Iodide	Teratogen	100g
Sodium Nitrite	Teratogen	250g
Sodium Salicylate	Teratogen	500g
Sulfuric Acid	Teratogen	1L
Tetracycline	Teratogen	50g
Zinc Sulfate	Mutagen	10g

Christine Griggs

Subject: FW: Question for Worker's Comp Questionnaire

From: Tom Lowery

To: Christine Griggs
Cc: Janice Grace
Subject: RE: Question for Worker's Comp Questionnaire

Hi Christine,

Here is my summary. I include this just to be conservative.

We work with superparamagnetic particles that are officially categorized as microparticles. They have a nominal diameter of 800 nm and contain nano-scale oxides within their material. We receive the material from the supplier as a microparticle. We work with these in a liquid suspension form and generate it as a reagent in our tests. Many people who work in the lab and manufacturing areas work with these particles.

Have you conducted a worker safety risk assessment to identify safety controls needed for nano-material activities? **Yes, we provide training on accessing the MSDS. There are no unique hazards for this material as a nanomaterial.**

Have you provided training to workers on the potential hazards and safety controls for the nano-materials in use? **Yes, we provide training on the MSDS. There are no unique hazards for this material as a nanomaterial.**

Exceprts from MSDS:

2. HAZARDS IDENTIFICATION

CAUTION!

Emergency Overview

May cause eye, skin, and respiratory tract irritation. The toxicological properties have not been fully investigated.

Appearance Brown

Physical State Dispersion

Odor No information available

Target Organs

None known.

Potential Health Effects

Acute Effects

Principle Routes of Exposure

Eyes

Skin

Inhalation

Ingestion

May cause irritation.

May cause irritation. May be harmful in contact with skin.

May cause irritation of respiratory tract. May be harmful if inhaled.

May be harmful if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Chronic Effects

None known.

See Section 11 for additional Toxicological information.

Aggravated Medical Conditions

No information available.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Haz/Non-haz	Component	CAS-No	Weight %
	Water	7732-18-5	< 95
	Buffer	NONE	< 2.5
	Sodium azide	26628-22-8	0.05
Magnetic Carboxylate-modified Microparticles		NONE	5.0

4. FIRST AID MEASURES

Eye Contact

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Obtain medical attention.

Skin Contact

Wash off immediately with plenty of water for at least 15 minutes. Get medical attention immediately if symptoms occur.

Inhalation

Move to fresh air. If breathing is difficult, give oxygen. Get medical attention immediately if symptoms occur.

Ingestion

Do not induce vomiting. Obtain medical attention.

Notes to Physician

Treat symptomatically.

7. HANDLING AND STORAGE

Handling

Ensure adequate ventilation. Wear personal protective equipment. Do not breathe vapors or spray mist. Do not get in eyes, on skin, or on clothing. Do not flush down the drain. Sodium azide may react with plumbing systems to form highly explosive compounds.

Storage

Keep containers tightly closed in a dry, cool and well-ventilated place. Keep at temperatures between 2 and 8°C.

Exposure Guidelines

Component	ACGIH TLV	OSHA PEL	NIOSH IDLH
Sodium azide	Ceiling: 0.29 mg/m ³ Ceiling: 0.11 ppm	Skin (Vacated) Ceiling: 0.1 ppm (Vacated) Ceiling: 0.3 mg/m ³	Ceiling: 0.3 mg/m ³ Ceiling: 0.1 ppm

Component	Quebec	Mexico OEL (TWA)	Ontario TWAEV
Sodium azide	Ceiling: 0.3 mg/m ³ Ceiling: 0.11 ppm		CEV: 0.1 ppm CEV: 0.26 mg/m ³
